Gas Storage - Confidential

- Rough (CSL)
 - Modelling of entire system (NTS to reservoir) to identify constraints on injection
 - Designed & specified compression trains
- Hatfield Moor (Scottish Power)
 - Developed fully integrated model of reservoir material balance, well inflow & outflow performance, compressor & turbine
 - Subsurface history matching & topsides production alignment
 - Identified opportunities to increase export rates
 - GASMAN™ model used by Scottish Power to produce weekly export & import forecasts (for use by traders)
